Specification

1. The use of the trademark TWEEN has been noted in this application. It must be capitalized wherever it appears and be accompanied by the generic terminology.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

Claim Rejections - 35 USC § 112

- The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 3. Claims 13-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 13, and 16-24 are indefinite because it includes the trademark "TWEEN". The trademark cannot be used because the composition covered by this trademark is solely within the control of the trademark owner and maybe subject to change over time at the sole discretion of the owner. The use of the trademark TWEEN has been noted in this application. It must be capitalized wherever it appears and be accompanied by the generic terminology, refer to MPEP 608.01 (v) and MPEP 2173.05 (u).

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in-
- (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).
- 5. Claims 13, 17, 19, 21-22, and 24 rejected under 35 U.S.C. 102(e) as being anticipated by Doyle et al. (US2002/0009436A1).

Doyle et al. teach a composition for inhibiting the adhesion or reducing the binding of the microorganism to animals such as poultry and cows, wherein the composition comprises carrageenan, carboxylmethyl cellulose, or arginine (paragraphs 23, col.3-col.4 bridging, paragraphs 40, 89, and 135). The limitations of detaching microorganisms from the animal would inherently be met since Doyle et al. teach using the composition to decrease the binding interaction between the microorganism and the

cell, such that a reduction in the binding interaction between the microbe and the cell inherently results in the detachment of the microorganism from the cell, tissue, or substrate.

Claim Rejections - 35 USC § 103

- 6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 7. The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
 - 1. Determining the scope and contents of the prior art.
 - 2. Ascertaining the differences between the prior art and the claims at issue.
 - 3. Resolving the level of ordinary skill in the pertinent art.
 - 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
- 8. Claims 14-16, 18, 20, and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Doyle et al. (US2002/0009436A1).

Doyle et al. teach using carrageenan to promote the reduction in the adhesion of the microorganism to the animal. In reference to claims 14-15, Doyle et al. fail to specifically teach the claimed species of carrageenan. However, it would have been

within the level of the skilled artisan to have modified the method of Doyle et al. to include species of carrageenan since Doyle et al. teach that carrageenan is used to promote the inhibition of the microorganism.

In reference to claims 16, 18, 20, and 23, Doyle et al. fail to teach contacting the animal or poultry twice with the composition. However, it would have been within the level of the skilled artisan to apply the composition to the animal depending upon the microbial population present, such that the composition is applied until the microorganisms are inhibited from binding to the cell, tissue or surface of the substrate.

Response to Arguments

- 9. Applicant's arguments directed to the use of the Trademarks in the claims are unpersuasive for the reasons set forth above. Refer to MPEP 608.01 (v) and MPEP 2173.05 (u).
- 10. The rejection of the claims under 112, second paragraph with respect to "effective amount" is withdrawn in view of arguments presented by applicant.
- al. are maintained for the following reasons. Applicant argues that the composition of Doyle requires the use of enzymes and the claimed method does not use the same composition as that of Doyle. Applicant's arguments are unpersuasive since the claim language of the instant invention does not exclude the addition of other components (i.e. enzymes) of Dóyle. Applicant further argues that Doyle fails to teach inhibiting microbial attachment to animal or poultry carcasses or seafood or parts thereof.

 Applicant's arguments are unpersuasive since the limitations of detaching

Application/Control Number: 09/832,211

Art Unit: 1746

microorganisms or inhibiting microbial attachment from the animal would inherently be met since Doyle et al. teach using the composition to decrease the binding interaction between the microorganism and the cell, such that a reduction in the binding interaction between the microbe and the cell inherently results in the detachment of the microorganism from the cell, tissue, or substrate.

12. The rejection of the claims as being unpatentable over Michener et al. is withdrawn in view of the newly amended claims.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sharidan Carrillo whose telephone number is 703-308-1876. The examiner can normally be reached on Monday-Friday, 6:00a.m-2:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Randy P. Gulakowski can be reached on 703-308-4333. The fax phone numbers for the organization where this application or proceeding is assigned are 703-305-7719 for regular communications and 703-305-7719 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0661.
